Hi Sandra

I have been asked to contact you by the Highways Team regarding Salt Bin supply

The very quick answer for you is that the bins are priced at £145.00 for the 200l bin and £185.00 for the 400l bin, prices are ex vat, fully installed and full of salt. We normally use green topped bins to differentiate Parish owned bins from Highways stock, although we can provide other options as required.

The price includes the process that we need to undertake, which starts with a site visit to ensure that your chosen location meets the requirements for Highways Team, not impeding Services or the pavement for pedestrian traffic, and that it is not in a dangerous positions for users, (not opposite a junction or on the outside of a bend etc).

If it satisfies the criteria, we then contact the Local Highways Engineer for permission to place the bin on the Highway. Usually, if there are any issues we can identify somewhere close by which will satisfy the requirements.

Once those permissions are gained, the green top bin will be placed out, and the initial fill of brown salt is included in the price, (Courtesy of the generous County Council!).

On going refills can be arranged but obviously the time of the season this is organised/ price of salt fluctuations etc makes it difficult to quote

I have attached a picture of the two bins, for your info - as stated, the current scheme of Parish bins is using green lidded bins.

The bins are supplied with a hasp, which unlike the public access Highway Bins enables you lock it out out season to prevent misuse / it becoming a litter bin

I have also attached our Use of Salt Advice sheet, which may be of assistance to your planning as to where to place the bins

If you have any questions please do not hesitate to contact me

Kind regards
