

Typical Dog Poo Bag Dispensers

They can be placed on existing street furniture, for example signage posts, streetlights or railings. We supply the fixings for the stations and that is included in the cost.

At the moment we are offering Councils one station plus two cases of bags for £288, which is a discount of £49. Additional stations for this offer are priced at £150 (standard RRP £199) and cases of bags are priced at £69. Prices as subject to VAT. We supply the bags in cases of 2,500 for the dog bags.

Our dog waste bags are 100% compostable and are made of a plant-based material. They are compliant with European standard EN-13432. This means the bags will disintegrate within 12 weeks and biodegrade at least 90% within 180 days in a municipal or industrial composting facility. Approximately 10% of solid material will be left at the end of the six-month-long process in the form of valuable compost, or biomass and water. These standards also ensure that the leftover compost will be free of toxins. The litter bags are made from recycled plastic, we're working on a bio-alternative with our supplier.

The stations can display whatever artwork and messaging you wish, there are some examples in the flyer and more can be found on our website. We find they are great in getting a message out to the community.
